Release Updates for
SigniFlow® V2023.22.0.0
01st June 2023

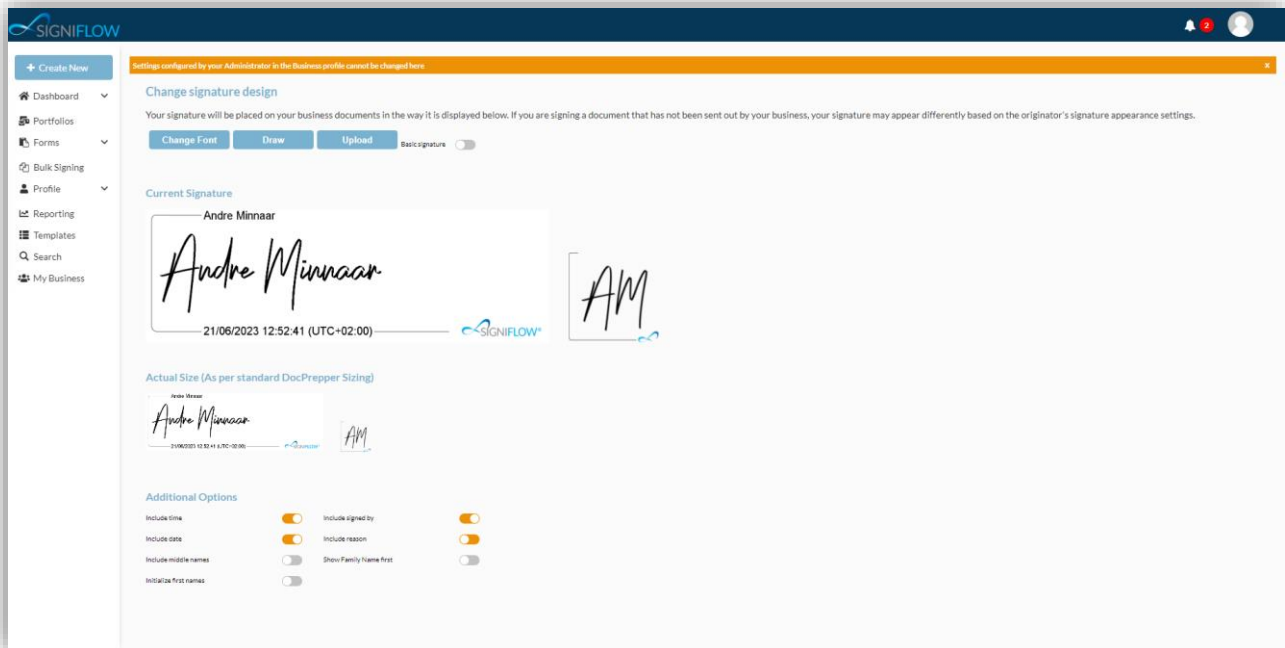

NEW FEATURES / ENHANCEMENTS (SYSTEM FRONT END)

🌀 New Signature format and functionality: To improve the experience of our customers, we have updated a critical portion of our application, the Signature Appearance. Below are the Release notes for V2023.22.0.0, which outline the changes to the SigniFlow® eSignature platform and how it will impact users.

- **IMPORTANT** – Any user that has a Font Signature will automatically be moved over to the New SigniFlow® Font.

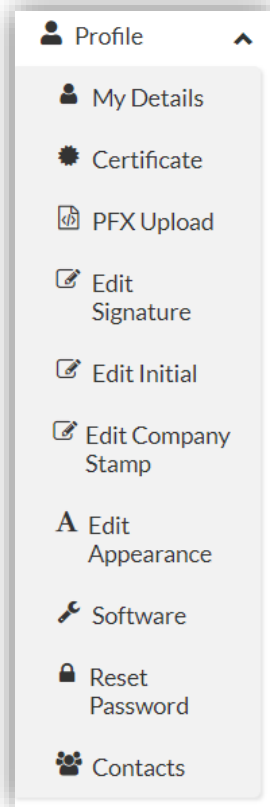

System before Change

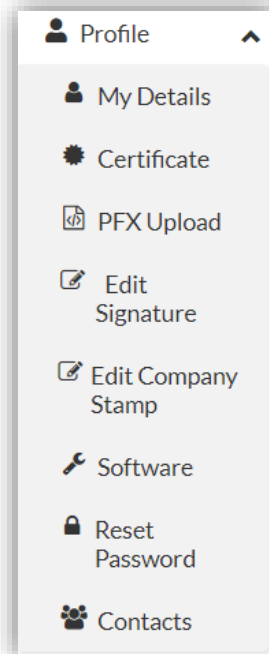

System After Change

NEW FEATURES / ENHANCEMENTS (SYSTEM FRONT END) - CONTINUED

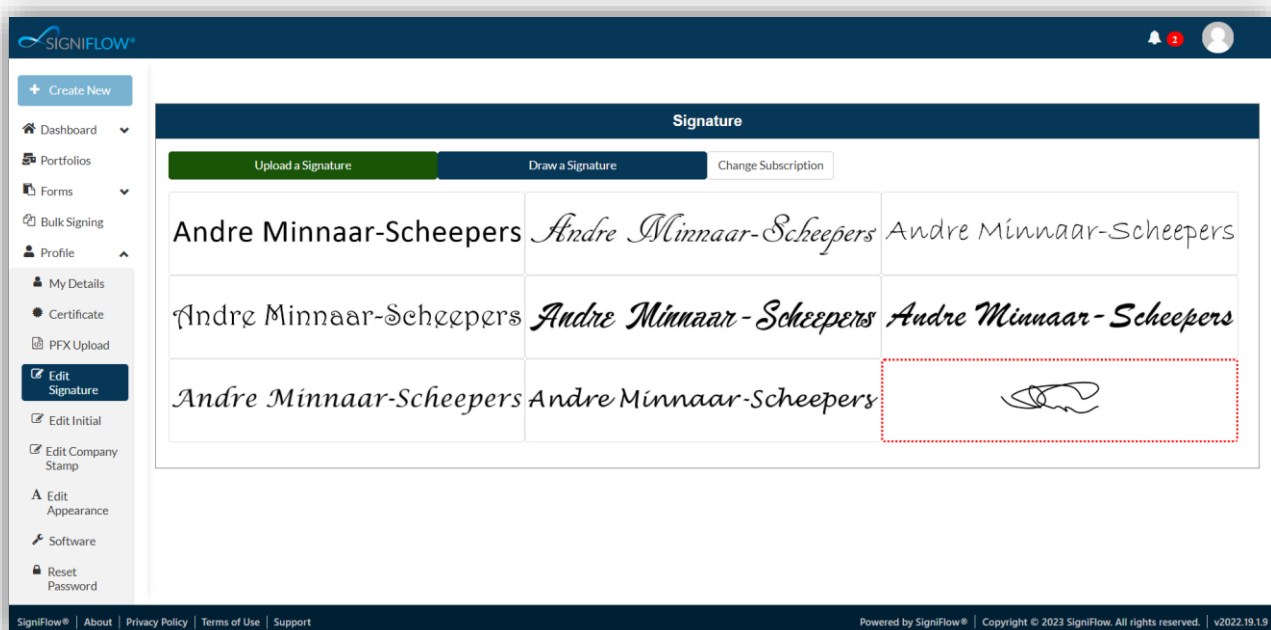

- On the Ribbon Menu of SigniFlow®, previously a user would have the Edit Signature, Edit Initial and Edit Appearance options available to them to configure and view their signature and initial appearance. These three options have now been consolidated into one option, Edit Signature, making it simpler for users to configure the appearance all in one location.

System After Change

Details that can be added to the Signature have also been improved, previously depending on the business profile settings users would be able to enable:

- SigniFlow Border.
- Reason.
- Signed By.
- Date.
- Time.

With the new improvement these options have been amended to be:

- Include time.
- Include date.
- Include the Signers Middle Names.
- Initialize First Names.
- Include signed by.
- Include reason.
- Show Family Name first.

This makes the signature more customisable and personalised for the users, but these settings are subject to the business profile settings, as these will always override the changes made by users.

- The business settings are indicated with the radio buttons shown in Orange, indicating that they cannot be changed.

System After Change

NEW FEATURES / ENHANCEMENTS (SYSTEM FRONT END) - CONTINUED

- SigniFlow® now introduces a "Basic Signature" option for users to choose from. The basic signature is all text as per the image below, and the wording is Digitally signed. The signature will automatically change based on the type of signature that is being used, if the signature is a Digital Signature it will say "Digitally signed by: __", if the signature is an Electronic Signature it will say "Electronically signed by __".

System After Change

- Users are now able to select from 4 signature appearances, with the Change Font, Draw and Upload buttons. The previous way of configuring the signature has been improved and streamlined in the new version of SigniFlow®.

NEW FEATURES / ENHANCEMENTS (SYSTEM BACK OFFICE)

🔗 The implementation of the new signature has impacted the back office of SigniFlow® with the

addition of 3 new fields included in the EasiSign Config, to cater for the new functionality within the front end:

- Include Middle Names
- Show Family Name First
- Initialise First Names

The screenshot shows the 'EasiSign Config for Signiflow Demo 2' interface. The left sidebar contains a navigation menu with items: Back To Signiflow, Business Dash, Business Details, Business Branding, Departments, Teams, Users, Custom Messages, MetaData, Template Admin, Document Templates, Form Admin, Events, Sharepoint Info, SMS Account, and Security. The main content area displays configuration options for 'Signiflow Demo 2'. The options are organized into two columns. The left column includes: Signature Type (User Choice), Signature Border (Yes), Signature Time (Yes), Signature Reason (Yes), Save Signature (Yes), and Doc Security Type (None). The right column includes: Initial Type (User Choice), Signature Date (Yes), Signature Signed By (Yes), Lock On Complete (No), Save Initial (Yes), and Geolocation (Optional). At the bottom right of the configuration area are four buttons: Save (green), Remove (red), Registration Config (blue), and Setup Default Config (blue). The footer of the interface includes 'Signiflow® | About | Privacy Policy | Terms of Use | Support' on the left and 'Powered by Signiflow® | Copyright © 2023 Signiflow. All rights reserved. | v2022.19.1.9' on the right.

System before Change

The screenshot shows the 'EasiSign Config for Andre Minnaar UAT' interface. The left sidebar is identical to the previous screenshot, but with 'EasiSign Config' highlighted in blue. The main content area displays configuration options for 'Andre Minnaar UAT'. The options are organized into two columns. The left column includes: Signature Type (User Choice), Signature Border (Yes), Signature Time (Yes), Signature Reason (No), Show Family Name First (empty field), Lock On Complete (No), Save Initial (Yes), and Geolocation (Optional). The right column includes: Initial Type (User Choice), Signature Date (Yes), Signature Signed By (Yes), Include Middle Names (empty field), Initialize First Names (empty field), Save Signature (Yes), and Doc Security Type (Registration & Login). At the bottom right of the configuration area are four buttons: Save (green), Remove (red), Registration Config (blue), and Setup Default Config (blue). The footer of the interface includes 'South Africa | About | Privacy Policy | Terms of Use | Support' on the left and 'Powered by Signiflow® | Copyright © 2023 Signiflow. All rights reserved. | v2023.22.0.0' on the right.
