

# Electronic Signatures in Qatar

In Qatar, the regulations around the use of electronic signatures are governed by the Electronic Transactions and Commerce Law No. 16 of 2010 ("the Law"). This law acknowledges the legal validity of electronic signatures and documents, but it sets certain conditions that must be met in order to qualify as such.

## Legality of Electronic Signatures in Qatar

Qatar's first comprehensive e-Transactions and e-Commerce Law was enacted by the Emiri Decree in 2010.

The e-Commerce Law includes provisions on areas such as e-signatures, e-documents and authentication. It covers e-Commerce transactions in Qatar, including e-Government services. The law was modelled on the United Nations and European Union models and directions on e-commerce and electronic signatures, and other international practices.

In a video conference seminar held in May 2020, Qatar International Centre for Conciliation and Arbitration (QICCA), legal experts said that there were many legislators supporting the use of digital applications and modern technology in civil and commercial trials. SigniFlow Advanced eSignature document workflow software helps Qatar businesses meet and exceed regulatory requirements for electronic signatures.

## SigniFlow Electronic Signatures in Qatar

SigniFlow's digital signatures provide a customised solution that perfectly matches Qatar's modern business environment. SigniFlow reflects Qatar's dedication to technological development and advancement, enabling a seamless, secure and efficient electronic document signing platform.

No matter if you are located in the busy city of Doha or the thriving business districts of Al Rayyan and Al Wakrah, SigniFlow empowers Qatari businesses to simplify their document signing processes easily.

SigniFlow is not just a software solution; it's a reliable partner for your digital transformation journey. As your business grows, our scalable platform grows with you, adapting to evolving needs.
