

Healthcare

SigniFlow Advanced eSign document solutions for Healthcare. When people think about health care, they think primarily about doctors and nurses. Medical administration serves in the background, but is in many ways the heartbeat of the Healthcare industry.

SigniFlow for Healthcare eases the load for medical administrators.

Healthcare Administration

SigniFlow is here to help with systems that automate and digitise medical administration.

Healthcare is one of the most complex and evolving industries. Yet, in most parts of the world it is still fully reliant on paper.

Administering prescriptions, patient records and medical insurance manually is an enormous task.

Patients are more remote than ever before, and the need for systems to be fully digital is acute.

A tool that brings it all together, and lifts the load.

Medical workers everywhere have spoken and we've listened. We get you. Keeping track of your electronic documents is super important. Getting documents approved and signed in as little time as possible, is a game changer.

SigniFlow was built to automate and digitise electronic document systems. SigniFlow Connect seamlessly integrates with healthcare systems, digitising the last mile.

You need more than just eSign workflow, you need a tool that understands healthcare.

INCREASED ESIGN EFFICIENCY

Get documents eSigned quickly & remotely

SigniFlow makes it easy for healthcare administrators to send contracts to customers for eSignature. Standard with trackable workflows, automated reminders, automated filing and detailed audit logs.

ESIGN DOCTORS' SCRIPTS

Legally compliant scripts

SigniFlow offers Advanced eSignatures for doctors to electronically sign prescriptions. Digitise and automate doctors' prescriptions with SigniFlow Connect for healthcare.

THANK YOU

We would like to thank all medical workers and first responders.

You are a true inspiration to us all.
