

Government

SigniFlow Advanced eSign document solutions for Government. In a sector that is expected to do more for less, we help accelerate service delivery for Government agencies.

Increase efficiency and save time by getting approvals and signatures faster.

The Digital Government

With a constant drive for digital transformation, it's no wonder Government agencies are feeling change-fatigued. SigniFlow can be deployed on-premise or in your cloud, or you can take advantage of our in-country SaaS offering in Microsoft Azure for Government. Rapidly deploy SigniFlow as a fully capable stand-alone eSign workflow system, or use it with your favourite document management or ERP system. Digitise the last mile for internal approvals, internal sign-offs, or remote eSignatures – or mix it up in a single workflow.

An eSign automation tool that brings it all together.

Government agencies everywhere have spoken and we've listened. We get you.

You need to deliver electronic e-forms and e-contracts quickly, while staying compliant.

SigniFlow was built to automate and digitise processes, to achieve just that.

You need more than just eSign workflow, you need a tool that understands Government.

THE DIGITAL GOVERNMENT

Get approvals fast

SigniFlow makes it easy for government employees to send contracts for remote approval and eSignature. Standard with trackable workflows, reminders, automated filing and audit logs.

AUTOMATION

Automating the last mile

Generate electronic forms and contracts with dynamic templates. Automate complex workflow scenarios with SigniFlow Connect. Send documents from your favourite App or document system.

MORE QUALITY TIME

Serving the public 24/7 can be exhausting

SigniFlow gives you some of your time back to spend on the important things in life.
